Re: Land Use changes in Upper Fraser Communities: A Research Data Base
From Local Photographic Material

Please accept this memo as an addendum to the CD Rom sent to you as a part of the Final Report for the Land Use changes in Upper Fraser Communities: A Research Data Base From Local Photographic Material project funded by the Northern Land Use Institute.

This memo is to clarify that the CD Rom was an up-to-date picture of the Upper Fraser Historical Geography Project web site where the photographs from the Land Use Changes project could be found.

Since the Upper Fraser Historical Geography Project is an on-going research project, we hope that anyone interested in viewing the information from the Land Use Changes project would go to the our web site at <http://web.unbc.ca/upperfraser/>.

Thank you again to the Northern Land Use Institute for their support of this project.

Sincerely,

Tracy Summerville
