

UNBC

**Dr. Kathy Lewis,
Program Chair,
Ecosystem Science and Management Program**

**The Community Development
Institute
Community Speakers Series**

“Forestry – a dying profession or an opportunity for rebirth?”

Dr. Lewis is a forest pathologist/microbial ecologist with research interests in the role of pathogenic fungi in natural ecosystem processes, and the long term effects of forest practices on forest health. In particular Kathy studies the relationship between biotic disturbance agents and stand dynamics, and the population genetics of forest pathogens as influenced by forest management practices.

Series Sponsors

**The Village of McBride,
The Community Development Institute at UNBC**

**Free
Public Lecture**

**Date:
Thursday,
October 02, 2008**
