National Farmers’ Market Impact Study 2009 Report

A baseline study that will serve as a benchmark for measurement of the contributions of farmers’ markets across Canada and an assessment of trends and opportunities for growth

January 2009
National Farmers’ Market Impact Study 2009 Report

Prepared by:
Experience Renewal Solutions Inc.

With support from:
David J. Connell, PhD,
Assistant Professor, University of Northern British Columbia

Study contracted by: Farmers’ Markets Canada in July 2008
Acknowledgments

Farmers’ Markets Canada appreciates the support of the following contributors:

Agriculture and Agri-Food Canada

• Farmers’ Markets Canada acknowledges the vital contribution of the federal government, through Agriculture and Agri-Food Canada, in enabling the extensive original research that underlies this report to be conducted and the report itself, in both official languages, to be produced.

• Agriculture and Agri-Food Canada is pleased to participate in the production of this report. AAFC is committed to working with our industry partners to increase public awareness of the importance of the agriculture and agri-food industry to Canada. Opinions expressed in this document are those of the consulting firm, Experience Renewal Solutions, and not necessarily of AAFC nor of Farmers’ Markets Canada and its members.

The Farmers’ Markets and their Managers

• Thank you to all 70 farmers’ markets that agreed to on-site observation and interviewing. The 70 market managers opened their markets to teams of anywhere from two to six researchers for a full market day. Also, this report would not be possible without the support, understanding and contributions of 282 market managers who responded to a long national survey. Your contributions are greatly appreciated.

The Vendors

• Close to 500 vendors agreed to complete the farmers’ market vendors interview at various locations across Canada. Thank you to all the vendors who set aside their daily duties to contribute their ideas, thoughts, insights and knowledge about the current condition of farmers’ markets in Canada.

The Market Shoppers and Non-Users

• Over 4,400 consumers agreed to participate in the farmers’ market interview at various locations across Canada and on the web. Most of the consumers showed a great attachment to their local market and were very willing to participate in the interview. Thank you to all of the consumers whose feedback and insights were essential to the completion of this report.

Economic Analyst

• Thanks to Dr. David Connell, of the University of Northern British Columbia, for your tireless and continuing efforts to understand and measure the community, regional and national economic contributions of farmers’ markets.

Farmers’ Markets Canada Board of Directors

• Thank you to the FMC Board of Directors. Their passion, knowledge, dedication and patience have aided in the successful completion of the project.

The State of Farmers’ Markets in Canada
Executive Summary 2009

- Farmers’ markets are a great success story for Canada, with strong consumer and vendor support as evidenced by the growth in attendance and number of markets. Success is built upon many factors including a desire to return to healthier, fresher, locally produced products and a strong belief in the integrity of shopping in the community.

- The diversity of market types across the 508 national markets provides consumers with a large number of alternatives when seeking community shopping experiences and local products.

- Markets offer a vast array of food and non-food items but clearly the largest demand is for fresh fruits, vegetables and baked goods.

- Most customers attend markets regularly and are strong supporters of the farmers’ market industry. They are highly motivated to purchase fresh, in-season produce in clean, simple surroundings.

- Customer spending across the country is variable with an average daily spend of approximately $32.

- Customers feel a strong sense of community and local pride in attending farmers’ markets. While the customer base of farmers’ markets parallels the grocery-purchasing demographics of Canada, the market customer is uniquely sensitive to the need to support local primary producers (62% feel this is extremely important, 30% feel it is somewhat important).

- Current customers will increasingly look for more product selection and convenience in locations, payment options and lifestyle amenities to ensure their loyalty.
\textbf{The State of Farmers’ Markets in Canada}

Executive Summary 2009

- Farmers’ market vendors are typically primary producers (79%) who achieve a significant portion of their income from participation in the markets; they also find a great deal of local support at markets and are attracted by the social and communal nature of the market experience.

- Market vendors are challenged to provide the selection of fresh products required as primary producers while dealing with issues of labour shortages and rising costs of production inputs - - they are also seeking extended hours and days of operations for markets, as well as improved physical amenities.

- In some markets there is a growing concern about the role of reseller vendors who are threatening the economic viability of the primary producer vendor.

- Vendors are looking for more support in marketing of their locations through signage, advertising and website information and would like to attract new vendors in desired local product categories to increase customer traffic.

- Market managers are seeking to develop farmers’ markets business growth by attracting and promoting more primary producers and increasing the attractiveness and convenience of the market facilities.

- Management and Association opportunities should focus on improving marketing efforts and making the physical market presence an attractive and more accessible venue.

- Increasing pressures will occur from Health and Safety requirements, parking needs for vendors and customers and balancing of primary producer capabilities and customer demands for year-round product selection.
The majority of national grocery shoppers are not using farmers' markets. Non-users are a target growth sector; they express a willingness to become patrons and are not visiting primarily because of convenience and lack of awareness issues. Future growth in the sector will require engaging non-users through increased awareness of benefits, locations and product selection. Trial usage among non-users will be dependent on making local market hours and locations more accessible to time-challenged, health-conscious consumers.

The future for farmers' markets in Canada is promising with consumer demand and interest closely aligned with support for local production and fresh, healthy food choices.

Farmers' markets are important contributors to the national economy with impacts ranging from $1.55 to $3.09 billion annually.
Fact Sheet
Farmers’ Markets in Canada - Insights

**HIGHLIGHTS**
- Farmers’ markets are strong contributors to the economy and to Canadian communities.
- Farmers’ markets play a key role in the marketing of Canadian agricultural products; they play a significant role in generating farm incomes.
- Strong growth opportunities in this sector focus on more aggressive marketing and promotion of markets; on encouraging additional vendors and vendor capabilities; on improved access to labour; and on the development of more and improved facilities.
- Farmers’ markets across Canada are very popular with their customers; 95% of customers feel the Farmers’ market experience met or exceeded their expectation.

**2008 Field Research Summary - Sample Sizes**
- There are 508 identified farmers’ markets across ten provinces.
- The 2009 Field Research profile:
  - 70 farmers’ markets were visited (14% sample)
  - 3174 shoppers were interviewed on-site
  - 1308 non-users were surveyed online
  - 487 vendors were interviewed on-site
  - 282 market managers were interviewed by telephone and web
  - Traffic counts and vendor audits were taken at surveyed markets

**Economic Impact in Canada 2008**
- 28 million shopper-visits were made to farmers’ markets in Canada in 2008
- Average in-market spending by principal shoppers is $32 per visit; ranging from $24.50 at small markets to $35.50 at large markets.
- Total farmers’ market direct sales across Canada in 2008 are estimated to be approx $1.03 billion.
- The combined national economic impact of farmers’ markets in Canada is estimated in a range between $1.55 billion and $3.09 billion.
Fact Sheet

Farmers’ Markets in Canada - Insights

Farmers’ Markets Shopper Profile in 2008

Demographic Highlights
The results showed that, on average:
• 72 % of market shoppers are female and 28% are male, nearly a 2.5:1 ratio
• 70 % of the principal shoppers are 40 and older; 30% of customers are 18-39
• 96 % of shoppers are Canadian born (83%) or have lived in Canada 20 years or more (13%)

Shopping Patterns
• 60 % state that fresh produce is their number one reason for visiting
• 69 % of shoppers use their own car to reach the market and 21% walk
• 67 % of shoppers take less than 15 minutes to get to the market from home
• 48 % of shoppers visit the market regularly (almost once a week)
• 54 % of market shoppers visit the market alone; 46% visit in groups
• 92% of shoppers state that buying directly from a local farmer is either extremely (62%) or somewhat (30%) important
• 25 % of shoppers are new or infrequent users, representing a growth opportunity

Shopper Satisfaction
• 95 % of shoppers find that their market experience meets or exceeds expectation
• 44 % are very satisfied with the variety of products
• 39 % are very satisfied with facilities at the market
• 56 % are very satisfied with the market’s location
• 81% of shoppers believe that food safety practices are better (46%) or about the same (35%) as grocery stores
• Market shoppers are generally pleased with the products they buy at their farmers’ markets but would appreciate more vendors providing fresh, in-season produce

Non-User Opportunities
• Non-users identify that location, convenience, competitive positioning and variety will attract them to farmers’ markets
Fact Sheet
Farmers’ Markets in Canada - Insights

**Market Profile from Market Manager Reports**
- 57% of markets are open Saturdays; 24% Fridays; 17% Thursdays; 2% other days
- 34% of markets are open more than 26 days per year; 40% of markets are open between 16 and 25 days
- August is the peak sales month
- 56% of markets are outdoor; 20% indoor; 24% both indoor and outdoor
- 46% of markets serve municipalities with populations below 10,000
- Market managers classify 68% of their vendors as primary producers: vendors that sell products that they have produced
- 80% of market managers report that the number of shoppers has increased (56%) or stayed the same (24%)
- 81% of market managers report that the number of vendors at their markets have increased (48%) or stayed the same (35%)
- 81% of market managers report that the number of primary producer vendors has increased (33%) or stayed the same (48%)
- 91% of markets are funded by vendor/booth rentals
- 68% of market managers report no financial support from governments or associations in the past 5 years
- 86% of markets have not had an economic impact assessment
- At markets reporting insurance policies, the average market premium is $1123 annually; 93% of markets have no claim history

**Vendor Profile in 2008**
- 42% of vendors achieve over 50% of their farm income from sales at farmers’ markets
- 60% of vendors sell fresh fruit and/or vegetables
- 79% of vendors identify themselves as primary producers
- 40% of vendors sell at only one market
- 79% of vendors report their business has grown bigger (49%) or stayed the same (30%)
- 71% of vendors travel less than 50 km to reach the market
- 55% of vendors report the creation of up to 5 jobs as a result of market participation
- 49% of vendors serve 100 or more customers on each market day
- 26% of vendors sell over $1000 on a market day
- Cost of fuel and cost of inputs are major negative factors impacting vendors
- Community and social aspects of the farmers’ markets are a major attraction for vendors
Introduction

The Organization

- Announced on November 10th, 2008, Farmers’ Markets Canada was formed as a national network for farmers’ markets that will help support producers, expand the growth of markets and boost rural economies. Farmers’ Markets Canada is proud to announce their establishment, which will look at national issues impacting farmers’ markets across our country. Canada is a country that is proud of our agricultural heritage and Farmers’ Markets Canada wants to strengthen that concept through market knowledge and expansion.

Purpose of this Study

- This study was contracted by Farmers’ Markets Canada to undertake a comprehensive market impact study. Recognizing that data on farmers’ markets across Canada was limited, this study was developed as a baseline that will serve as a benchmark for measurement of the contribution of farmers’ markets Canada over time. This study was created around two main areas:
  - To understand the profile of the shopper at farmers’ markets: demographics, motivations and regional differences to increase sales and opportunities for the future.
  - To understand the profile of the vendors at the farmers’ markets: to attract additional vendors and to expand product offerings and market appeal.

FMC’s Mission Statement:

“Our Vision is a future where every Canadian has easy access to a farmers’ market”
Data Collection
National Sample Size

* A similar Farmers’ Markets Ontario study was completed in conjunction with the National Farmers’ Market Impact Study. 12 Ontario markets were included as part of the FMC sample; 24 markets were included as part of the FMO sample – in total, 36 Ontario markets were surveyed.

• Size of Community  
• Trading Area  
• History of Market  
• Role of Managing Assoc./ Provincial Assoc./ Provincial Government  
• Selling Characteristics | 282 phone surveys completed of 500 Markets contacted |
| **Traffic Count**  
ERS In-Experience Observation techniques | • Estimate of number of people visiting market | 68 Markets |

- Called all known market managers from 10 provinces (AB, BC, MB, NB, NF, NS, QC, PEI, SK)
- Collected contacts for a market database by searching online for the market managers’ contact information
- Contacted local municipalities, Chamber of Commerce or provincial associations if required
- Interviewed to provide a composite national profile of farmers’ markets

- Conducted traffic counts at selected locations across Canada
- Traffic counts taken each hour on the hour for ten minutes at each exiting point at the market
- Observed market customers entering market to gain a better understanding of traffic flow
Market Customer Profile
Customer Demographics by Market Size

- Large markets are attracting younger customers while small and medium markets are visited more by seniors.
- Market customers are typical grocery customers, ages 25-64.

- Small size market: 0-19 vendors
- Medium size market: 20-39 vendors
- Large size market: 40+ vendors

28
Farmer Direct Purchase Importance

Customers at all sizes of markets believe it is important to buy from local producers.

Please rank the importance of buying product from an actual farmer rather than buying product from a person who buys the produce from a food terminal or farmer(s) and resells it to you at the market.
Market Factor Importance

- The majority of customers believe that fresh, in-season, locally produced products are the most important factors that markets deliver. The least important factors are certified organic, low price, and nutritional labelling.

How important are the following to you?

- Fresh, in-season products: 77%
- Locally produced products: 68%
- Friendly service: 47%
- Fair trade products (made by someone who gets fair wage and fair treatment): 43%
- Conveniently located and easily accessible from my home: 37%
- Product packaging that is environmentally friendly or recyclable: 36%
- Wide variety of products: 34%
- Support for animal welfare (the use of animals in food/research as long as unnecessary suffering is avoided): 34%
- Natural but not certified products (i.e. wild, grain fed, not sprayed): 28%
- Clean and easily accessible market facilities (seating area, washrooms, parking): 25%
- Attractive product presentation/displays: 3%
- Clear and effective labelling of nutritional content: -7%
- Certified Organic: -8%
- Low price: -11%

Market Factor Importance vs. Satisfaction

- Satisfaction aligned to the importance customers feel for key factors will drive opportunity for the industry.
  Customers place more importance on fresh and local products than is currently being delivered – an opportunity.

Factors Encouraging Farmers’ Market Visitation

- Location, convenience, competitive pricing and variety will attract new customers

How likely would each of the following factors encourage you to visit a farmers’ market?

- A market conveniently located in my neighborhood
- Competitive pricing (comparable or cheaper than the grocery store)
- Convenient days and hours of operation
- A large variety of food items
- A market dedicated to locally produced food products
- Attractive facilities
- Food from my home country
- A website that helps me locate a farmers’ market
- Convenient parking
- More information about local markets close to my home
- More information about products offered at local farmers’ markets
- A market where vendors speak my language
- A market accessible by public transportation
- A market dedicated to organically grown food products
- A large variety of arts and crafts items
- Entertainment

Vendor Pleasure Points

• “In their own words”

Community
“[The market] attracts a lot of people, [has] lots of events, musicians, community. [It’s] consistent, well-organized. The location [and] vendor spots can be reserved.” Medium Market, British Columbia
“There is a limit on each category. Everyone comes out in the community and the market is located in a good location.” Medium Market, British Columbia
“You get to market your product to people you would not normally see. I like being around the other vendors; I can talk to people and share ideas.” Small Market, Alberta
“Parking is great. It is a nice market and in a way it is good we don’t have tourists, locals coming on a regular basis, supply is great convenient demand and size of market. It is fun for the most part.” Small Market, Ontario

Location
“I like that it is open year round and that it is open indoors and that I only work 3 days a week.” Large Market, Alberta
“I love the location, lots of amenities, [and] eclectic group of people. The group of farmers that are there stay true to the ideology of farming.” Small Market, Ontario
“The location is great; located near natural surroundings. And there is lots of open space.” Medium Market, Ontario

Friendly
“Storage and [the] help with table set-up.” Small Market, Alberta
“Atmosphere - [it’s] like a small village where friends can get together. The close relationships that are built with customers.” Large Market, British Columbia
“Friendliness, quality of products - organic, local. The support from the community, and the location.” Medium Market, British Columbia
“I enjoy the one on one time I get to have with my customers.” Large Market, Alberta
“I like the signage to get here. It was very easy. Volunteers were here ready to help and the market manager walks around giving all vendors water.” Medium Market, British Columbia

Design
“I don’t have to set up a tent - the awning is permanent. [There are] lots of friends here and getting to meet people.” Small Market, Saskatchewan
“That I can leave my stuff set up all week.” Large Market, New Brunswick
“There is lots of parking. I can unload everything easily, there is plenty of room between the vendors, the customers are also family oriented and the management is good.” Medium Market, British Columbia

Vendor Pain Points
• “In their own words”

**Design**

“[It] needs a seating place. We need to have a permanent site, more vehicles (out-of-market site). Power and water should be available to everyone.” *Small Market, Alberta*

“Too many browsers just having a ‘Sunday outing’.” *Medium Market, Alberta*

“Not owning this space. 2 or 3 times a year they would have other events at this spot and we could be forced to stop. I would prefer a permanent space.” *Medium Market, Ontario*

“Money is not accessible in that there is no cash machine.” *Medium Market, Quebec*

“We don’t have our own building. It looks like crap. We need our own building.” *Large Market, New Brunswick*

**Parking**

“Parking is bad for driving customers. Hours are long; if I’ve sold out early than waiting until 3pm is too long.” *Large Market, Manitoba*

“I do not like how poor the parking facilities are.” *Medium Market, British Columbia*

“Loading is troublesome at times. There is a lot of carry when you can’t pull up.” *Large Market, Ontario*

**Management**

“Management has not done a good job of enforcing their own rules. The stalls are not consistently far enough. You don’t get a nice straight line. It chokes traffic.” *Small Market, Alberta*

“The hours of operation for the markets are suited for the vendors and not the customers.” *Medium Market, Quebec*

“BCFA rules that we can only sell what we grow personally. Why can’t we share the growing and the selling of let’s say carrots (local produce)?” *Medium Market, British Columbia*

“Enforce the [no] dog rule - they don’t and it’s a safety issue.” *Medium Market, Ontario*

“I don’t like it when they sound a horn to start and end a market. Vendors should be able to sell whenever the market is open.” *Medium Market, British Columbia*

**Outdoors**

“[It] could use security because there is a chance that booths left unattended could experience theft. (An) indoor area would be nice for the Fall.” *Medium Market, British Columbia*

“I wish it was in a park – concrete just kills the mood. Allowing people to come even if they haven’t grown everything themselves.” *Small Market, Ontario*

“More food vendors - balance the market out better with craft vendors. I would like to see a indoor/year-round market.” *Large Market, British Columbia*

Vendor Suggestions for Improvement

- Improved marketing efforts top vendor suggestions

What suggestions do you have for improving this farmers’ market?

- Marketing Efforts: improved informational signage, improved advertising, promotions, road signs
- Building Design: heat, electricity, permanent site/stalls, seating, space, wider aisles, tarp coverings, aesthetics, etc.
- Improved Guidelines: no dogs, no smoking, no re-sellers, permanent-site markets, etc.

National Farmers’ Market Impact Study 2009 Report
Vendor Suggestions for Improvement
• “In their own words”

Marketing Efforts
“If OFA could do radio advertising during months of July and August and take clips of markets for promos on TV (i.e. public service announcement for tourism).” Medium Market, Ontario

“Each stand should be equipped with water, electricity and shade and some more advertising.” Medium Market, Ontario

“Fridays need more entertainment or something to draw the people in.” Medium Market, Nova Scotia

Building Design
“Location issues [although] police presence has really improved the situation. [I] would like to extend the growing season!” Large Market, British Columbia

“Year-round indoor facility with expansion outside in the summer. A seminar for vendors for reducing crime at tables.” Large Market, British Columbia

“Year-round market. And support from the city (i.e. access to building). Indoor/outdoor market in the summer.” Large Market, British Columbia

“We could utilize the outside better, clean up more and advertise more.” Small Market, Prince Edward Island

More Vendors
“Open it up to crafters to fill the building. There is a pool of talented craft makers that need a place to call home.” Small Market, Saskatchewan

Improved Guidelines
“The definition of ‘seasonal products’ should be enforced. FMO sets down a number of definitions for ‘seasonal’. There is a problem with part-time crafters. FMO should act as a fair arbitrator. Set-up an arbitration committee.” Medium Market, Ontario

“Food safety is a little over the top. [We need] consistency in food safety inspectors. More adequate power available.” Medium Market, British Columbia

“I would like to sell eggs but am not currently allowed to by the egg marketing board. MB chicken producers is discouraging small chicken farmers.” Large Market, Manitoba

“There should be more parking. The government should promote and support local producers and provide clearer regulation of Organic Certification.” Small Market, Saskatchewan

“Standardize the layout, extend the hours of the market. Some vendors get 2 tables instead of 1 for the same amount of rent.” Medium Market, Ontario

“There should be credit/debit on-site (shared cost). There should be assigned spots for full time vendors and this should repeat over the years.” Medium Market, British Columbia
National Farmers’ Market Interests

- Marketing support (including website and bags) are strong vendor interests
- Insurance is of interest to 39% of vendors

Would you find value in the following services if they were offered by a National Farmers’ Markets Association?

- Discounted group insurance: 39% (National Average), 36% (Small), 40% (Medium), 41% (Large)
- Cloth shopping bags: 69% (National Average), 75% (Small), 65% (Medium), 66% (Large)
- Website Directory: 74% (National Average), 69% (Small), 76% (Medium), 77% (Large)
- Other Marketing Support: 68% (National Average), 72% (Small), 67% (Medium), 63% (Large)
