

GEOG333/NRES763

2023 PHYSICAL GEOGRAPHY FIELD SCHOOL Quesnel River Research Centre (Likely, BC)

Techniques in Ecohydrology & Aquatic Processes

Experience and learn about freshwater ecohydrology, limnology and fluvial geomorphology in a fascinating watershed located at the foothills of the Cariboo Mountains, in a globally-unique Interior Temperate Rainforest, on the banks of one of British Columbia's premier salmon rivers, and at one of the world's deepest fjord-lakes.
