## Wireless setup for Mac

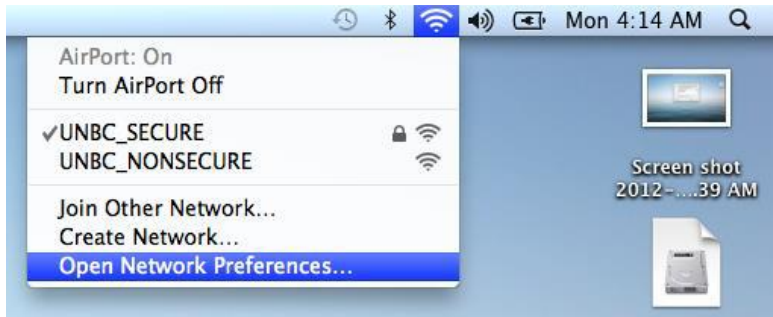

Access the airport in the top-right hand corner, by clicking the wireless icon on the taskbar and select UNBC\_SECURE as your network .

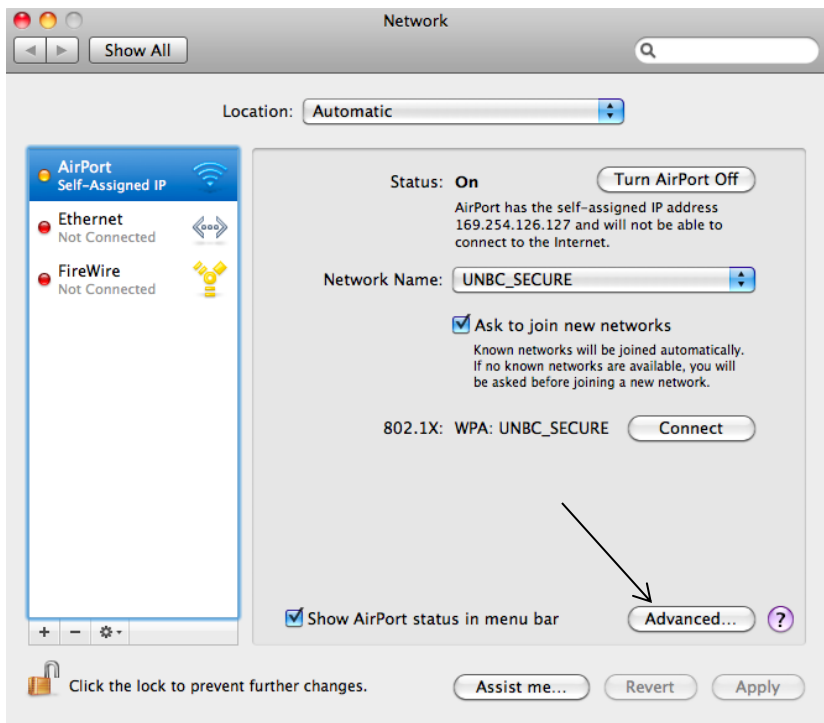

For User Name, put in "uni\" and then your username, and then your password for Password.

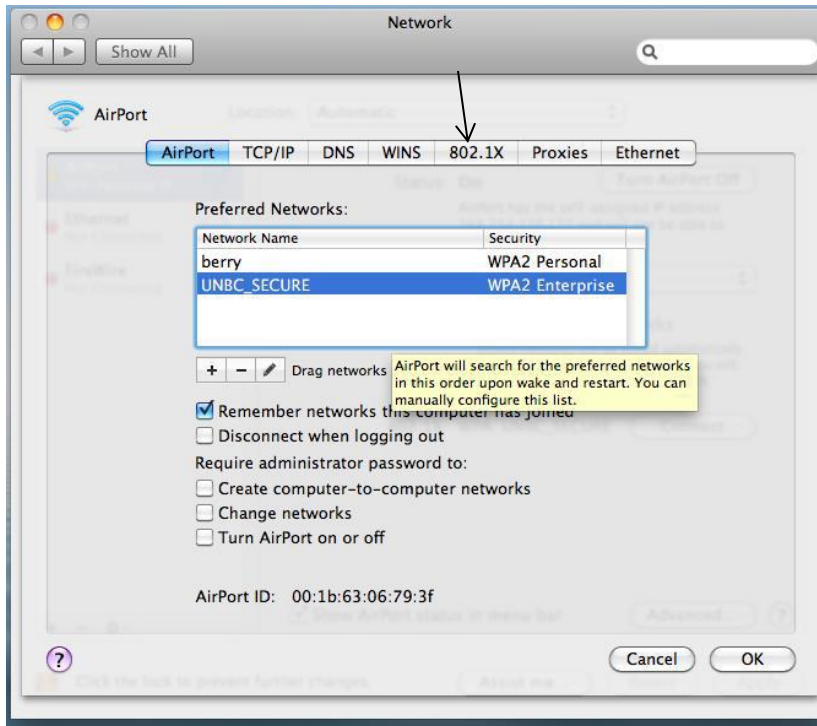

If the UNBC\_SECURE network cannot be found, click the wireless icon again, and select "Open Network Preferences..."

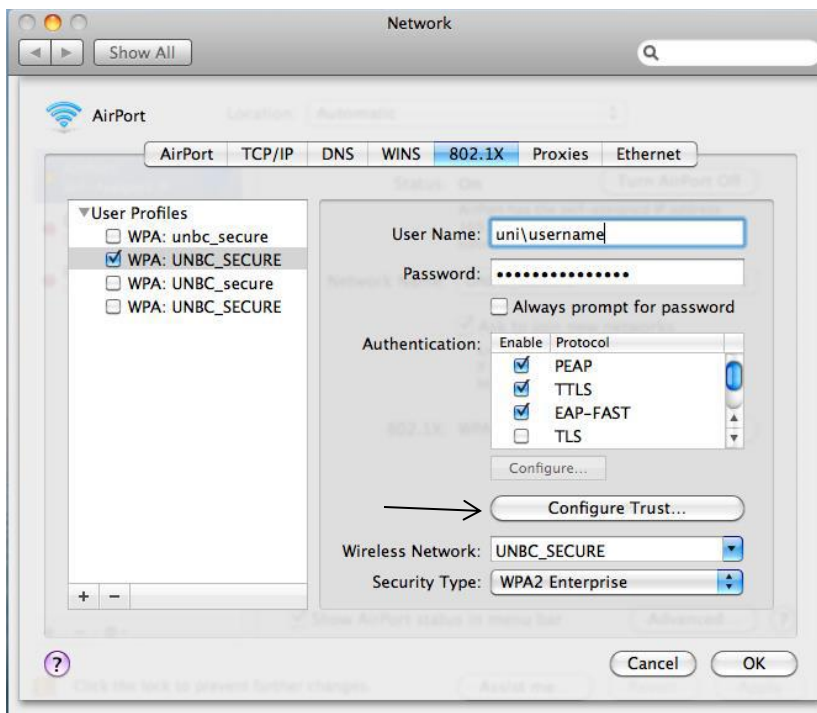

Click the "Advanced..." button

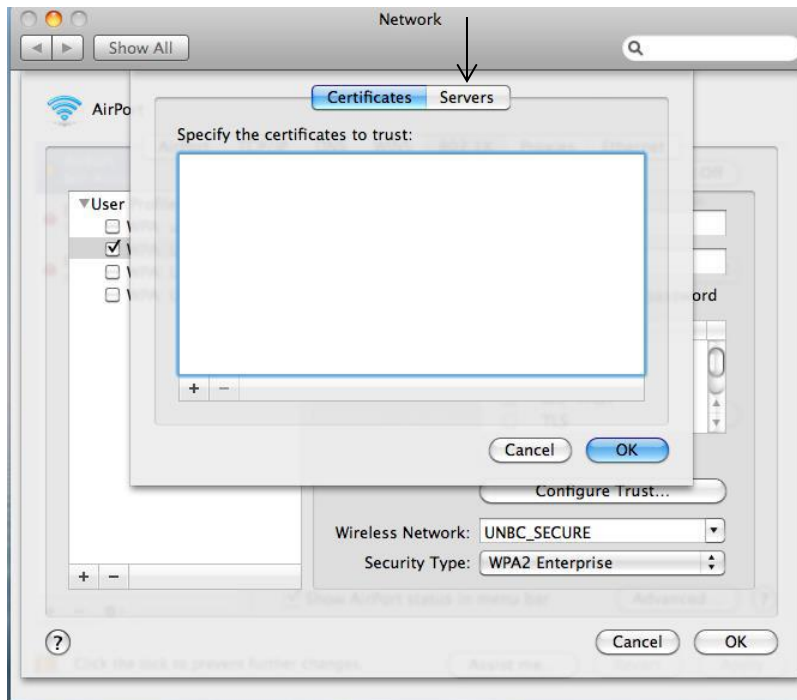

A new window should have popped up. Click the 802.1X tab.

...and click on "Configure Trust..."

Click on the Servers tab in the new window

Where it says “Untitled Server” type in “pg-uni-rds-03.unbc.ca; pg-uni-radius-04.unbc.ca” and then click OK in this window and the one underneath it.

Attempt to connect to the network, and it should prompt you for a username and password.
