

Public Presentation – Terrace Campus

January 15, 2020 12:00 pm – 1:00 pm

This session will also be available via livestream: [/http://www.unbc.ca/northwest/livestream](http://www.unbc.ca/northwest/livestream)

"Democratizing Conservation Planning for Nature and People"

Presenter:

Richard Schuster

Research Associate, Carleton University
Adjunct Professor of Ecosystem Science
& Management, UNBC

"Conservation planning is challenging, with multiple, often conflicting demands on an area of interest. To date, most tools that can help us make decisions are task specific and technical. We have developed a flexible and powerful framework that can help solve these problems. The goal is that non-technical stakeholders can devise high-quality, data-driven spatial plans in just one hour."
