# PROTECTED OR IN PERIL? THE PEACE RIVER BREAK IN THE CANADIAN ROCKIES

**7:00 pm**

Few people know it, but the Peace River Break is one of the most ecologically diverse places in the Yellowstone to Yukon region. It is also one of the most endangered, with not many protected areas and shrinking habitat for wide-ranging wildlife. The Peace Break provide a crucial wildlife link between the Rocky Mountains to the south and north. Industry is expanding fast there, and the prospect of a third hydroelectric dam, "Site C", on the Peace River, threatens this remarkable landscape.
