A fishing experience of a lifetime!

Fort Babine Lodge was started in the early 1990's by a group of Fort Babine entrepreneurs (members of the Lake Babine Band) that wanted to develop economic development projects off of reserve lands in a manner consistent with their traditional beliefs and standards.

Trout and Salmon galore!

Pat Michell and his wife Agnes were instrumental in the formation of this lodge, along with several other hereditary chiefs of the Lake Babine Band that represented each of the respective four clans that make up the Lake Babine Nation (Grouse/Beaver, Frog, Bear, and Caribou). The Nation is also known as the Na'dut'en People and share the same dialect and government stuctures as many other local Nations such as the Wet'suwet'en people of Moricetown and Hagwilget. Although business ventures are new to this group of aboriginal business people, they are still attempting to provide a resource for local employment as well as providing a quality fishing and wildlife adventure for their customers.

... more about Fort Babine Lodge

History abounds in this area, along with the tranquility of nature and the fishing experience of a lifetime.

The lodge consists of 8 log cabins that are beautifully constructed and located near the mouth of the world famous Rainbow Alley where the rainbow trout fly fishing is unparalleled anywhere else in the world. The main lodge log building currently serves as a residence for a local missionary of a church for the nearby community of Fort Babine, but will likely be added as restaurant facilities for cabin patrons in the coming seasons. Some photos are available here ... look for more to be added soon! There are several boats available for rentals as well as fully serviced RV sites.

STEELHEAD, the mighty sea-going rainbow trout, begins to arrive back in this area in late July and remain in the river over the winter. Cutthroat and Rainbow Trout, Dolly Varden, White Fish, LingCod (Barbot) and Char are resident year round.

7 cabins to choose from, but book early to ensure a reservation.

<u>The fishing.... World class.</u>

Bring your favorite rod -- and camera! The *SALMON* runs of the Babine River are some of nature's finest work. Numerous stocks of five species (Sockeye, Chinook, Coho, Pink and Steelhead) return from the sea each year. The wild stocks of Sockeye begin to arrive in early July while some of the Coho stocks are still arriving in November.
