

## FULBRIGHT POST-DOCTORAL RESEARCH AWARD

RESEARCH AND COLLABORATE  
WITH TOP-TIER SCHOLARS

**US\$30,000 for one academic year**

Health Benefit Plan

**Fulbright Enrichment Opportunities**

Access to a prestigious worldwide  
network of scholars

**Access to world class universities**

MENTOR STUDENTS

*Located in the spectacular landscape of northern British Columbia, UNBC is one of Canada's best small universities, and for its size, is among the most research-intensive universities in Canada. Much of UNBC's research focuses on the social, economic, environmental and cultural issues of the North. This has led to the establishment of world-class research in such areas as natural resources and the environment; rural, northern and environmental health; and the sustainability of communities. UNBC offers interdisciplinary PhD programs in natural resources and environmental studies, in health sciences and in psychology. Research partnerships with the private sector and public agencies have strengthened UNBC's role as a resource for the communities of its region. This includes research on the mountain pine beetle, sustainable forest management practices, bio-energy and the bio-economy, environmental remediation, air quality issues, watershed management, local and Aboriginal governance, social and economic development in the North, determinants and delivery of health care and climate change issues.*

**Specialization:** *Natural resources and environmental studies; community development; rural, northern and environmental health; First nations and indigenous studies.*

### **APPLY NOW!!**

Deadline : August 1, 2014

Award for September 2015

Apply for **AWARD 5491**
